Product Details

Lounge chair is available as a single-seat, loveseat, and sofa.

Bariatric lounge is available with two seat widths: 30" and 40". Bariatric seats have been tested to a dynamic load of 500 lbs and a static load of 1500 lbs.

Ash wood is featured on all Tava product. Wood is a natural product with inherent variation. Every piece of wood, even from the same tree, is slightly different in color, texture, and grain.

Different fabrics can be specified on the seat and back. Fabric on the back will match the fabric on the arm panel.

Moisture barrier on the seat is available as an option.

Bench is available in four width sizes: 21", 42", 56", and 70".

Bench with table units are available in 56" and 70" wide versions. The table portion of the bench is 14" wide. The 56"W bench has one table, the 70"W bench can have one or two tables.

Freestanding tables are available.

Guest seating will be available in single, double, and triple seat versions as well as bariatric in Winter 2011.

Highback seating will be available in standard and bariatric widths in Winter 2011.

Surface Materials

All Nurture seating with standard upholstery fabrics comply with the State of California Technical Bulletin 117.

California 133 Option

Nurture offers Fire Code Seating Modifications (FCS) on nearly all seating models. The most rigorous fire codes in the nation have been developed in California, and the Steelcase FCS modification is designed to meet those codes. Fire Code Seating (FCS) indicates that a product is constructed to meet the strict fire code requirements of high public occupancy areas such as hospitals, theaters, meeting rooms, and lobbies. The FCS standards will meet both the State of California Home Furnishings Technical Bulletin 133 (CAL TB 133) and Boston Fire Code (BFC). Boston adopted the California Home Furnishing Technical Bulletin CAL TB 133 test standard in 1992.

CAL 133 is specified using an "F" suffix. When an "F" suffix is available, it means that these models have been tested and certified using approved fabrics. A complete list of approved fabrics are listed on the COM website at www.Steelcase.com

If a specific chair/fabric combination has not been tested, an actual burn test can be performed on the product in the specified fabric. The cost of the test is \$700 (net). Please allow a minimum of six weeks for the production of the chair and the completion of the test.

Fabric Application Direction Guidelines

What is the issue?

Some textiles are simple and look the same regardless of how you apply them to a product. Other fabrics are patterned, textured, or have luster that will have a distinctly different appearance applied in a different direction on a chair. Because of these differences, and the fact that there are limits to how some fabrics can be applied to Nurture products, it is important to understand fabric application direction when ordering a product to avoid being disappointed.

Talking about direction

Fabrics come on rolls. The long yarns that run down the length of the roll are called the “warp” yarns. These yarns are used to define the direction you are viewing the fabric as it is applied to a chair. Fabric directionality is determined by how the fabric comes off the roll.

It is NOT determined by the way the pattern looks on the product. For example, the image below shows the fabric applied warped horizontal although the stripes appear vertical.

Terminology

Steelcase uses the terms warped horizontal and warped vertical. There are other terms within the industry that are used that have the same meaning:

- Warped horizontal is also referred to as: railroaded or across roll
- Warped vertical is also referred to as: woven way, down roll, or top out

Why is it important?

Dealers must specify fabric application direction when ordering COMs and Nurture Graded-In fabrics. We require the dealer to specify the direction because we do not know which way customers want to see a pattern on the furniture. Therefore, it is critical to know how the pattern is run on the roll to ensure that Nurture builds and ships each order to the customer’s expectation each and every time.

Correct?

How do I know which way the fabric comes off the roll?

Most textile companies will swatch their fabrics in a warp vertical (woven way, down roll) direction. Some exceptions might be made to address patterns especially with stripes. Typically, when a fabric is swatched in a warp horizontal (railroad or across roll) direction, the direction is noted on the swatch card or fabric sample. If in doubt of a fabric direction, we encourage you to contact the textile vendor for clarification.

Vinyl

Vinyl generally only passes on Nurture product in a horizontal or across roll direction. This is due to physical properties of the material. If a vinyl is applied in the opposite direction, too much stretch in the material can compromise the overall aesthetics of the final upholstery. If a patterned vinyl is being specified and the vinyl must be run in a vertical direction, pre-approval must be arranged through Nurture. Nurture will consider the request and a decision will be made based on the specific vinyl and product combination. Contact Nurture’s Customer Care line.

Required Action Steps before Specifying

1. Verify by using Steelcase’s COM website that the fabric is approved on the product.
2. Verify the direction that the fabric can be applied. Occasionally a fabric is only approved in one direction.
3. Confirm with the customer how they want the fabric to look on the furniture.
4. Confirm using the swatch card or vendor’s website the direction the sample is shown.
5. Now you’re ready to place the order.
