FAMILY OF SEATING

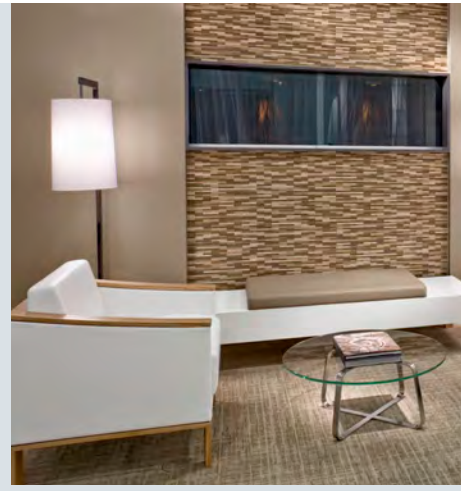

tava

DESIGNED TO PLEASE

Tava™ combines form with function and refinement with practicality to brighten environments with a full family of seating. With its clean design and high level of fit and finish, Tava brings the essence of hospitality into healthcare waiting spaces – enhancing style, comfort, and peace of mind.

COMPLETE

From lobbies to corridors, Tava provides thoughtful choices for a variety of waiting spaces. A selection of lounges, bariatric lounges, benches, and coordinating tables accommodate any length of stay.

ELEGANT

With a clean and refined aesthetic, Tava offers a fresh transitional design that is elegant from all sides and angles. Crisp lines with ash wood and mitered joints create a solution perfect for small intimate surroundings and open spaces.

DURABLE

Spring-seat construction, top-stitch care, seam placement, and a durable and tested structure combine to make Tava a solution which will keep its refined aesthetic through the rigors of a 24/7 healthcare environment.

SMART

Constructed with infection control in mind, all Tava seating solutions feature a crumb sweep and the ash wood bases of the lounges, tables and benches are easy to clean around.

“We wanted to bring a higher level of design and detail to a versatile seating solution while respecting the requirements and needs of a true healthcare appropriate product.”

Alan Rheault, Nurture Director of Industrial Design

Bariatric Lounge

Loveseat Lounge

Bench

Ash wood arm and leg assemblies feature mitered joints.

Leg mitered joints are reinforced with steel connections and finger joints for added strength. Standard with adjustable glides.

Bench with Table

Coffee and Side Tables

All seating solutions have a spring seat construction and crumb sweep.

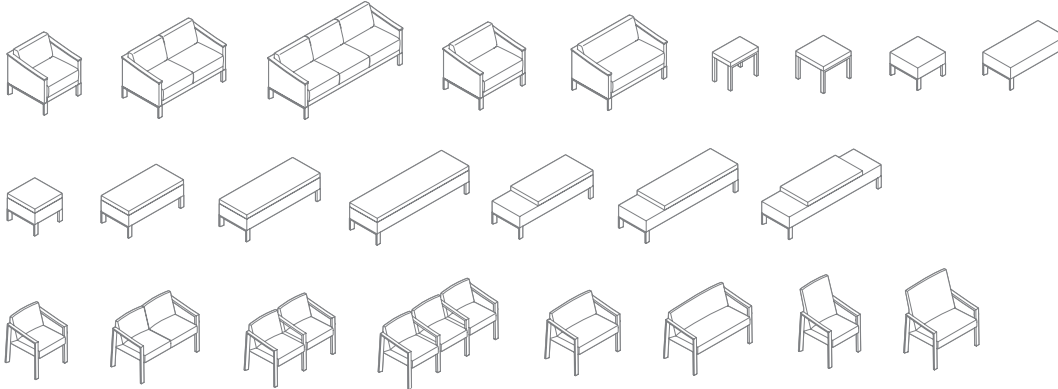

Table tops and bench bodies feature a seamless construction and are available in solid surface and painted steel.
